GOLD DIGGING.

Uneducated Men Who Received More Harm Than Good from the Acquisition of Wealth

The more the element of chance enters into the acquisition of money, the greater is the harm it does the man who gains it. This probably is the reason why gold-digging seldom elevates, either morally or materially, those who follow it. It demands of the digger enterprise, perseverance, toil and indifference to hardship, qual ities the exercise of which should make a man of him. Yet the "luck" associated with the business seems fatal to manly virtues and permanent pros-

The digger may toil for weeks with-out "raising the color," and all the time he sees his neighbor of the next "claim" washing out an ounce of gold to the pan. The view is not likely to eradicate his natural envy or covetous ness. On the other hand, he may, by a few days of "prespecting," wandering over the barren hills, with a donkey for a companion and a burden bearer, stumble upon a fortune. In most cases the "find" tempts the finder to add another to the thousands of illustrations of the fact that that which is gained without labor is spent without thought.

A gentleman of large experience in the Australian gold fields says that al most the only instance he ever knew where an uneducated man did not receive more harm than good from find ing gold, was the following: A man who had been a few months

A man who had been a few months in the colony, and had supported himself by digging in a garden, went up to the "diggings." He knew nothing of mining, and could hardly, tell quartz from common rock. Within two weeks he stumbled upon a nugget of pure gold, weighing seventy ounces. That wery day he started back to the coast, as if in a hurry to get away from the mining district. On reaching a seaport, he engaged passage for England on the first boat, and went home to enjoy the profits of his brief mining expedition.

As an offset to this rare case, the As an offset to this rare case, the gentleman mentions several cases in which men were ruined by their suddenly acquired wealth. Four sober, industrious men worked a claim in partnership. They struck gold, and in a few weeks took out one hundred thousand dollars apiece. But in two years three out of the four died drunkards, and the fourth lost every penny ards, and the fourth lost every penny of his fortune by prospecting for gold and buying unprofitable claims.

A blacksmith dabbled in mining, and

got into debt. One day he struck gold. He worked on, and was soon in the reccipt of twenty-five hundred dollars a day. His claim continued to "pan out" better and better, until no one, not even himself, knew how much he was worth. The man had the stuff in him out of which a noble character might have been formed. He taught himself to read and write, and for a season went onward fitting himself to become a good citizen and a safe man But madness was in his blood. H

took to wild speculation in gold mines, set up a racing stud, "bulled" or "beared" the wheat market, and went into every thing which admitted of gambling. The nervous strain tempted him to brace himself with stimulants. He became a drunkard, and in a few

A few years ago a young man o Boston was the marvel of his friends. His mercantile ventures turned out a large profit. Whatever be touched stocks or merchandise, turned into gold. Young men pointed him out as the envied one, and crafty mothers with marriageable daughters viewed him as a "catch" to be worked for. But old merchants shook their heads. Knowing that it requires as much self-control and wisdom to keep a fortune as to gain one, they looked to see i this young Napoleon of the street was moved by a mercantile head or a gambler's rashness. Within four years from the time that his name was synonym for success, he was a bank upt. - Youth's Companion.

A DIPLOMATIC RUSE.

How Lamartine Escaped the Embraces an In the year 1848 Lamartine received at the Hotel de Ville in Paris a deputation of so-called "Vesuviennes"—i. e., women of the people, who bore a strong resemblance to the Tricoteuses, or knitting-women of the Great Revolution, and looked as if they meant mischief. The band penetrated to the room where Lamartine was at work; he stood up and inquired what the ladies wanted. "Citizen," answered their spokeswoman, "the Club of the Vesuviennes have decided to send a deputation to show how much they admire you. There are about fifty of us here, and we have received orders to -kiss you." The tone and manner in which this was spoken showed plainly that they would brook no denial. How ever a lucky inspiration came to the re-lief of the poet. "Citoyennes;" he said, "I thank you very much for the sentiments to which you have just given expression, but allow me to tell you that patriots like you have ceased to be too. Now, men don't kiss each other but content themselves with a shake o the hand." The President of the Pro visional Government by this elever maneuver escaped fifty embraces, to his no little comfort and joy. - Chicago

MAY17.1893-017 SHAWIS -- dis, just received, at LINE LATEST Novelties in French Dress Goods

There seems to be no donot that the most glaring frauds were perpetrated by the McLean gang in Cincinnati, on Tuesday, and the decent people of that city, of all shades of politics, are thoroughly aroused and indignant. The authorities last night feared an outbreak, and took extraordinary precautions to preserve the peace. The indignation is so marked that the gang is thoroughly frightened, and as a consequence the attempt to nullify the will of the people will hardly be successful. It now seems ovident that the Republicans have carried their legislative ticket in Hamilton county, with a single exception, and nothing can prevent the election of a Republican successor to John Sherman. The plurality for Foraker will not be far from 18,000, and the majorities on the balance of the state ticket will be still greater.

The claim of the Democrats, that

they have carried the Ohio legislature, gives fresh point to the remark attributed to Assistant Postmaster General Stevenson, to the effect that he could not account for the claim set up by them before the election, only that it was the habit of the Ohio Democrats to claim everything, whether in eight or not.

Ir seems that after all, Ohio can be carried by the Republicans without the aid of United States Marshals. This should be a relief to those Democrats who bolieve that Lot Wright has been doing all the Republican voting in that state for the past few years.

According to the New York Evening Post, 99 out of every 100 Mugwumps will vote the Republ.can ticket this fall. In other words, only 10 out of every 1,000 of them are too contrary to acknowledge that they made a miserable mistake in trying to serve the cause of reform by helping the Democratic party last year.

Cincado Journal: There is not a more moral or a more progressive region in the Union than is that known as Ohio's "Western reserve." That is the region that produced such noble mon as Joshua R. Giddings and James A. Garfield. Its people are in great part of the good old New England stock, and when it comes to a question of right or wrong, they can always be relied upon to array themselves intelligent ly and conscientionsly on the right side. It was almost a matter of course that at the election last Tues day the glorious Western Reserve would poll a very large Republican majority, but it was hardly anticipat ed that its Republican vote would s largely increased as it was It is very evident that they want no third-party Probabition nonsense in their politics in the Western Reserve. They are for temperance and sobrio-

An Unqualified Success, The great St. Louis Exposition has now been open over a month, and it has been an unqualited and unprecedented success. Visitors from all parts of the Union pronounce it the grandest exhibition of the kind ever opened. Nearly ball a million people have passed through the doors up to this time exclusive of exhibitors and doad heads, and it will not close until Oot. 24. The magnificent display of art, science, machinery and the trades, the grand munication by all kinds of electric lights, the mammoth Music Hall, the soul-stirring music of Glimore's world famous baset, the relies of the Grooley Arctic Expedition, togother with the thousand and one other splendid it atures, form a colossal collection of all that can attract, instruct, astonish and smuse.

All who have not yet been to St. Louis should take advantage of the wonderfully cheap ex-oursions next Thursday, Oct. 22, over the Wabash line. Rates will be reduced to the lowest agures over offered, and Hekets will be good on all trains. Visitors will be allowed two entire days from date of starting to see the Exposition and roturn home. We earnestly advise all our readers to call on the nearest Wabash agent, learn the rates, buy tickets, and go. It is the opportunity of a literimo.

The Court of Alabama Claims Sit Down Upon Attorney J. F. Manning.

FROM WASHINGTON.

Millions at Stake; and the Governmen Without an Advocate-Why Judge Vincent Was Removed.

The New Catholic University-Garlan Will Stick-Persia's Offer-Value of Exports.

Must Apologize or Remain Out in th

Cold.
WASHINGTON, D. C., October 16. Mr. J. F. Manning, the attorney who, on his disbarment by the Court of Alabams Claims, instigated the recent official ob jections to the "necessary incidental expenditures" of the court, filed a motion through his counsel. Colonel R. J. Christle, asking for reinstatement, which was yesterday passed upon by the Court, in a written opinion delivered by Presiding Judge Harlan, and concurred in by the other two judges. The motion was denied, first, because it did not contain an apology for the ian-gaage and conduct which caused the disbarment; and secondly, because since the original offense, the Court finds that Mr. Manning bay issued two printed statements, one a circular addressed to his clients and the other a letter in a Massachusetts paper, both over his own signature, in which he uses language grossly abusive of the Court, and its authority. No court, it is said, could with dignity or self-respect permit any person to practice before it who had deliberately used such language with respect to its members or its decrees or orders. And this court will not grant any motion to restore said Manning, except upon an unequivocal denial under oath that he was the author of these papers or upon the fullest apology and retraction, coupled with an assurance that if relastated he will conduct bimself in future in a manner

becoming an attorney of the Court.

The Court has disposed of nearly 400 cases since it reassembled on the 5th last., and those most interested in pending claims confidently expect that the whole docket will be cleared early in De-Millions at Stake, and the Government Without an Attorney.

WASHINGTON, D. C., October 16 .- Arguments were made by attorneys reprecenting the Back Bone Land Grant before Secretary Lamar, of the Interior Department, and Attorney-General Garland and Assistant Secretary Jenks, sitting as a board. The Back Bone Land Grant was a conspiracy to obtain from the United States Land Office a tract of land upon the Mississippi River which bad been forfelted under its original grant. The grant was assigned after the

time had clapsed, and was claimed after-wards by a railroad built upon the oppoate side of the river from which the line carrying the original grant was run.
This fraud was passed upon by the Land Office in the closing hours of the last ad-ministration. Secretary Teller helped it through, and extra haste was employed in the Land Office to get out the patent for this great domain. It was impossible to complete t before the Department changed accreturies. Steps were taken immediately to stop the issuing of patents. Argument has now been made to Induce the Secretacy to Issue the remainder of the natents. The decision of the Department mobility will be this: No action will be taken, but the matter will be referred to Congress. Secretary Lamar is not disposed to favor the applicants. Unless Congress next whiter takes some antion to set aslde the fraud, the Interior Department may be compelled to issue the patents under all the circumstances. The noticable thing about the case is the fact that the claimants for all this ivad were represented by a mob of at-

Why Judge Vincent Was Removed. Washington, D. C., October 16-It appears now that Judge Vincent, of New Mexico, was suspended at the auggestion of Secretary Lamar. Judge Vincent is a Democrat from Illinois, who has been living for a year or two in New Mexico. He recently appointed S. W. Dorsey, A. G. Burnham and Juan Carillo a commission to select a Grand Jury for Colfax County, New Mexico. Secretary Lamar has been diligently investigating land frauds alleged to have been perpetrated In that county and locality, and the question of the punishment of the accused parties would come before the juries, to be selected by the Commission named. It seems that Burnham and Carillo are interested with Dorsey in business speculations, and the Interior Department authorities are not willing, in view of the facts before them, to have the judicial machinery there controlled by these men. The authorities here are unable to account for Judge Vincent's action in the premises. It is looked up-on as entirely inexcusable. The selec-tion of these Jury Commissioners was made at a time when, in behalf of jus-tice, it was the desire of the authorities to have the legal machinery in the hands

of the very best citizens. The New Catholic University. Was hington, D. C., October 10 -Bishop Ireland, of Minnesota, one of the Board of Directors of the new Catholic University to be established in this city, states that the directory will meet in Baltimore on November 11th, but will adjourn at once to this city, when the adjourn at once to this city, when the who was seized by the young outlaws, university will be formally incorporated. terribly assaulted and then left lying on university will be formally incorporated. ooked forward to with considerable in terest, as it was stated Attorney-Genera Garland would tender his resignation as one of the President's advisers. The atory proved to be without foundation however, for the session was a brief one, not lasting an honr, and nothing was broached by Mr. Garland on the subject of resigning. It is alleged as a founds tion for such a story that the Attorney General was nettled at the notoriety given him to the telephone suit controversy and that he deemed it best to retire from his office gracefully. Secretary Lamar, when questioned on the subject, said that Mr. Garland had no such intention, for he would certainly have informed his associates yesterday if he entertained an idea of this kind. On the contrary, he took some new matters intrusted to his by the President, and that ought to be sufficient denial of the story.

Persia Auxious for American Immigra tion and Capital. WASHINGTON, D. C., October 16 -- I

a dispatch to the State Department dated the 7th of September, the Dragoman of the United States Legation at Teheran gives the substance of a recent conversa tion with the Persian Minister of Foreign Affairs, in which his Excellency asked whether the Americans would engage in business in Persia, as the Persian Government was dis-posed to offer every facility in its power to improve business rela-tions between Persia and the United States. Any proposals from Americans for concessions for tramways, rallways, mines or commercial projects, he said, would receive the most serious and favorable consideration from the Persian Government.

A Republican Claim.

WASHINGTON, D. C., October 10.-A private dispatch was received here last night from Cincinnati from a Republi can source which states that the official figures will show that the Republicans will have a majority in both the House and Senate, and eighteen majority on joint ballot; that that they have elected nine Representatives and four Senators in Hamilton County, and the Democrats have elected one Representative. Hoadly carries Hamilton County by 389 majority, running 1,000 ahead of the Legislative ticket. The Democrats elect four of their ticket in Cincinnsti.

Increased Value of Exports WASHINGTON, D. C., October 16.-The Calef of the Burean of Statistics report that the total value of exports of beef pork and dairy products for hine months ended September 20th last aggregated \$72,020,056, against \$70,450,621 during a like period in 1854.

EXPELLED FROM A RINK.

The Embarrassing Situation Into Which a Giddy Girl Led Her "Mash," ELIZABETH, N. J., October 10.-Last rear the manager of the Temple Roller Skating Rink had some difficulty in keep ing the class of patrons up to the desired standard. A number of giddy young girls who, in some cases, were not as monmapect as they might have been, were ejected from the building. Among the number was the petite and not badlooking daughter of a promineut Justice of the Peace. She, in the judgment of the rink manager, was not entitled to the floor or building. When requested to withdraw she was very indignant, but the business manager, A. A. Simonds was obdurate, and she was escurted t

oue of the exits, a On Monday last the young girl went to a Newark rink and there became acquainted with a young man whom she in-vited to call and see her at her Elizaleth home. The new 'mash' called and asked her to go to the rink. Thinking that in her escort she would have a champion, she went, and, there being a new doorkeeper, there was no trouble in gaining an entrance. Soon she was on skates and mingling in the whirl. But her sport was of short duration. The manager's eagle eye spied her, and she was a quested to withdraw. She protested and her escort remonstrated, but quieted down when it was whispered to him that argument was useless.

They rl's father now swears that he wid sue the rink company if It takes ten years' fees. The affair has caused considerable comment and gossip, and the result is abxiously awaited. The young man from Newark said he did not know torneys, while there was no one present who the gall was, and had only come to to act as counsel for the Government in see her at her request. PHISBURGH, PA., October 16 -A Chronicle Telegraph Primiose (Pa) spec.al says: Last evening a number of female scholars returning from school at Oakdale, near here, were met by three boys (two white and three colored) aged about eighteen years, who attacked them with revolvers. All of the girls escaped but Annie McKemp, fourteen years old, the ground unconscious, where she was found some hours later by her friends. A posse was organized at once to capture the assailants, and after a long search they were not down and arrested at Prim-rose. The condition of Miss McKemp is serious, and it is feared she will not recover. Indignation runs high and lynch-lug is freely talked of. The boys arrested answer the description of three escaped prisoners from Morganza Reformatory.

THE PLEASURE ISLAND RACE. Hanlan and Lee Easily Beat Courtney

ALBINY, N. Y., October 16 .- The double-scull race between Hanlan and Lee and Courtney and Couly took place yesterday at Pleasure Island before a large concourse of spectators. At 3:55 p. m. all was ready, and shortly after 4 p. m. the word was given. Hanlan and Lee caught the water first and sent their shell half a length to the front, steadily increasing this lead with a stroke of thirty-eight to the minute. Courtney and Conly seemed to pull rather unevenly. At the first quarter Haulan and Lee led by three-fourths of a length. From this to the three-fourths both crews pulled hard and kept the same relutive distance apart. same relative distance apart. At the cud of the first mile Hanlan & Lee bad alightly increased the gap turning the buoy a length in advance. Courtney and Conly steered wildly and made the turn rather clumsy. Hanian and Lee wor easily by three lengths in eighteen minutes fifteen seconds, with Courtney and

Conly fifteen seconds later.

When two and a half miles was completed Hanian and Lee rested a few sec onds, and again rested upon entering the home stretch. At each rest when Courtnev and Couley had almost reached their stern, Hanlay and Lee, with a few quick strokes, would send their shell ahead three or four lengths. Referee Osmond stated that Haulan could have made better time if he desired. Courtage took Haulan's water several times. Haulan and Lee were greeted with great enthusiasm after the race. Very little money changed hands on the result.

A Row at a Western Union Stock holders' Meeting.

NEW YORK, October 16.-It is said that there was quite a scene in the Western Union stockholders' meeting Wednes day J. C. Reiff of Woerlshhoeffer & Co. a small stockholder, astonished the managers of the mesting by asking for information about the exact relations of the Matual Union Company as a part of the Western Union system, and on failing to receive the desired explanation, he moved for the appointment of a committee to examine the accounts and furnish a full report to the stockholders. After some sparring Mr. Field raised the question of Mr.

Reiff's right to offer such a resolution, and the Secretary of the meeting said that the only right of a stockholder defined by the by-laws was the right to vote for directors. On Mr. Field's mo-tion, therefore, the resolution was tabled and the discussion cut off.

GIVEN A RIDE.

Forcible Abduction of the Prisats of St Joachim's Catholic Church. DETROIT, MICH., October 15.-The French congregation of St. Joachim's Catholic Church are much exercised over the action of Bishop Borgess in refusing to allow a French priest to have charge of the church. Much feeling has arisen out of the deposition of Father La Porte and the appointment of Father Dangelzier. After supper last evening Father Dangelzier and his assistant retired to their apartments in the second story of the parochial residence adjoining St. Joachim's Church. About nine o'clock they were surprised by a violent ringing at the door bell. An assistant, clothed in the garb of a brother, responded, and threw the front door wide open. As the light of the lamp streamed out upon the steps, it disclosed six masked men, who crowded into the entrance. The leader was a brawny man in a dark suit. His right hand held a revolver which was leveled full at the brother's head. "Hold up your hands," commanded the leader, in French, as he stepped in-side the door, followed by the rest of the

invaders.
Aithough greatly startled, the brother made an effort at resistance. The crowd soon overpowered blm, however, and proceeded up stairs and ordered the priests to pack up their things and va-cate the premises at once under pain of death. Resistance was useless, so their trunks were hurriedly packed, and the two priests were escorted to the front Carriages and express wag-were in waiting. The and effects were loaded trunks

into the wagon, and the fathers were un willingly pushed in o the carriages. One asked to be taken to the house of Mr. Chene, and the other was driven to the parochial residence connected with the Pollsh Church. The masked inviders were left the sole occupants of St. Joa-chim's Parish residence and the church adjoining. They still hold the fort.
This morning Father Dangelzier visited

the Bishop's residence to lay the matter before Vicar-General Hennaert, the Bishop being in New York. It is generally believed among Catholics that the Bishop will not only excommunicate the parties to the transaction, but will visit his wrath on St. Joachim's entire parish and church. Father Dangelzier says he can identify the leader of his assailants.

BOSTON, MASS., October 16 -Yesterday morning's session of the American Board of Foreign Missions was opened with devotional exercises, conducted by the Rev. Geo. F. McGowan, D.D. Prayer was offered by the Rev. A. S. Chapin, D.D., of Beloit. Hons. D. Hastings, of Wisconsin, from the committee to which the Treasurer's report had been referred, reported that the report was ansolutely correct, and expressed the utmost confidence in the Treasurer. In view of certain newspaper charges of misuse of funds, an investigation was recommended. Hon II. A. Hardy, of the Prudential Committee, said that the treasury had been sacredly watched; that the Treasurer's accounts are inspected his securities examined by a committee and his reports based on the results o the examination. The Prudential Committee courted examination. On the speaker's motion a committee was ap-pointed to examine the Treasurer's re-

The Industrial School for Girls A good many of our people will be interested to read the following from the Thicago Times' report of the proceedings FRED WARDE, who is to be here next of the annual meeting of the lady managers of this institution

Considerable dissatisfaction was ex pressed with the course and actions of a person calling himself M. V. B. Van Arslale, at one time a preacher and employed as state agent for the industrial school, as state agent for the industrial school, which position he used to perfect a schome of his own which is not well thought of by those who are acquainted with it. Van Arsdale's scheme seems to be, by that was said by the ladies, to collect money for the clucation of deserving poor girle, which he pockets and sends the girls to some school where free edu poor gers, which he pockets and sends the gris to some sohool where free edu-cation is already provided for in such cases, thus winning the glory and pock-eting the sheckels. Mrs D L R Ward ner, of Anna, said she had attended at

dvertised annual meeting of Van Ars dale's National American Educations society She found it after an extended search in a dark room in the Sherman louse, and those in attendance consisted of Mr. Van Arsdale and a superanuated of Mr. Yan Aradale and a superanuated minister, who acted as his agent. Bishop Cheny's name appeared on Van Aradale's circular as a director, but the bishop de-med all knowledge of the scheme, and declined to indorse Van Aradale in any way In all this man had raised nearly way In all this man had raised nearly \$3000, which probably had been used for "expenses." Last spring a bequest for benevolent purposes had been left in Elgio, and Van Arsdale had made efforts to get it for his "benevolent' scheme. Mr Preston, the Chicago bank er, at one time consented to act as treas-urer for him, but never had but \$100 in his hands, and that was drawn out as

soon as received. Mr. Preston said he thought Van Arsd de was the "association himself He continually had the benefit of railroad passes obtained on w. representations that they were to be used of the cause Mrs. Wardner did not claim that Van Aradele had stolen any money from the Industrial School, bu did claim that he had used its credit and reputation for his own purposes. Stolen Horse Recovered Some time during Wednesday night thief entered Wm. A. Ragan's barn, on West Prairie street, and stole the family horse, "Ned" Mr. Ragan made diligent inquiry about the horse, and by accident earned that a strange animal answering Ned a description had been found Thursday morning in the front yard at the farm of Emery Janviin, two miles west of Warrensburg. Mr. Regan has recovered Ned, and in future will see that the family bulldog is on guard. The horse, when left at Mr. Janvrin's home, was covered with foam, indicating that he had been ridden hard by the thief, who is still at Bartholomew's equine paradox

THE SALMON.

Fow the Salmon is Enabled to Jump We Prof. A. Landmark, Chief Director of the Norwegian Fisheries, has published some interesting particulars of his studies of the capability of the salmon to jump waterfalls. He is of the opinion that the jump depends as much on the height of the fall as on the currents below it. If there be a deep pool right under the fall, where the water is comparatively quiet, a salmon may jump sixteen feet perpendicularly, but such jumps are rare, and he can only state with certainty that it has taken place at the Hellefos, in the Drams River, at Haugsend, where two great masts have been placed across the river for the study of the habits of the salmon, so that exact measurements may be effected. The height of the water in the river, of course, varies, but it is, as a rule, when the salmon is running up stream, sixteen feet below these masts. The distance between the two is three and one-half feet, and the Professor states that he has seen salmon jump from the river below neross both masts. As another example of high jumping, he mentions some instances of Carratunk waterfall, Reumber, in North America, where jumps of twelve feet have been re-corded. Prof. Landmark further states that when a salmon jumps a fall nearly perpendicular in shape it is sometimes able to remain in the full, even if the jump is a foot or two short of the actual height. This, he maintains, has been proved by an overwhelming quantity of avidence. tity of evidence. The lish may then be seen to stand for a minute or two a foot or so below the edge of the fall in the same spot, in a trembling motion, when with a smart twitch of the tan the rest of the fall is cleared. But only lish which strike the fall straight with the snort are able to remain in the falling mass of water; if it is struck obliquely, the fish is carried back into the stream below. This Prof. Land mark believes to be the explanation of salmon passing falls with a clear descent of sixteen feet. The Professor elieves that this is the extreme jump a

day school, yesterday afternoon, a reporter found the members paired of into fifty classes, there being one teacher to every papil. Only half s dozen of the studious Chinamen had reached the stage of civilization marked by parting with their pigtails and Chinymns in concert and then singing them. The boys' made a rush for the Secretary's table, where they received primers. From them they proceeded to study out a few verses of Scripture. At the close of the lesson a number of hem were called with the state of the lesson and the state of the lesson and number of hem were called with the close of the lesson and number of hem were called with the c them were called upon to recite verses, which they did with more or less excel lence of pronunciation. A teacher was asked the reason for the individual in-

struction of the pupils. ruction of the pupils.
"They are awfully jealous," replied
to. In the first place they are very particular about accepting a teacher at all, an old lady being generally declined with little ceremony and great decision. Then after one is stalled as teacher 'the boy' refuses to share her with others. One even refused a few Sundays ago to allow his own cousin in his class. Many of the teachers are out of the city now, and we have very hard work filling their places. When a teacher intends to be gone only one Sunday it is often pos-sible for her to induce her pupil to agree to accept another teacher for the time but unless a positive promise is exacted John is likely to be absent the next Sunday, or if he comes he takes a tent in the back of the room and re-luses to be taught. They have excel-lent memories, however, and they often commit to memory an entire chapter of the scriptures at one lesson. Many recite their verses in very good style This was the second Chinese school started in the city, the opo at Farwell Hall being the first. This one has been running now a little over two years Some of 'the boys' have been here ever since we started and show the greatest possible progress. Many of them are exceedingly bright and intelligent, but they are naturally bashful and need lots of coaving,"—Checago News.

USES OF BEESWAX.

An Article Whose Value Is Not Generally The uses to which beeswax is applied are many and important. Its property of preventing mildew and of preserving tissues was well known to the aucients, who used cereeloth for embalming. For encaustic painting they used beeswax, as shown in the wall pictures of Pompeii. The Roman Catholics use beeswax candles and tapers in all the ceremonies of their church, as well as in their processions. Manufacturers of glazed, ornamental and wall papers use quantities of beeswax, as also the manufacturers of paper collars, cuffs. etc. for polishing surfaces. Wax is used in paints and varnishes, and for "stuffing" of wood to be polished for fine coach work, pianos, furniture, and parquette flowers. It is used by plasterers and electrotypers in forming their moulds, and is also used as an important ingredient in preparations for covering the surface of polished iron and steel to prevent rust. It is com-bined with tailow to form a coating for canvas and cordage, as sails, awnings, etc. Artificial flowers consume much wax, and the purposes to which wax is applied are continually widening as

new inventions come up and new pro-cesses are discovered. We have only
